The  
data centre  
trade association

Lynchpin Media is an independently owned media communications company, whose main aim is to help organisations reach and influence decision makers in Europe, the Middle East and Africa. We have a growing database of over 340,000 global IT decision makers.

Our ethos is based around intelligence obtained from targeted campaigns. By understanding our audience we are better informed to advise our clients and help forecast market trends. We work with our clients to identify new customers and their requirements.

*Intelligent Data Centres* is a technology brand that encompasses various intelligence platforms aimed at the enterprise IT sector to provide targeted updates and research-driven information.

As part of Lynchpin Media, this digital medium gives unparalleled advice to the data centre industry within the EMEA region.

Data centre managers, practitioners and technical teams face the constant challenge of deciding where to prioritise investment, while demonstrating the business value of their projects and embracing the strategic benefits their businesses are striving to achieve.

Against this backdrop, there is also a growing need to include strong business justifications alongside the well-worn IT metrics that typically examine application delivery in isolation.

*Intelligent Data Centres* strives to bridge this gap between the traditional role of the data centre manager and the new-age demands weighing in on this pivotal role as enterprises continue to progress their Digital Transformation strategies.

Spreading our resources across print, digital and events, *Intelligent Data Centres* endeavours to guide its readers within Europe, the Middle East and Africa with thought leadership, industry expertise, knowledge sharing and practical platforms from which to better understand the views of the data centre industry, encompassing the voice of vendors, distributors, resellers and the all-important end user.

With social media supporting all the above, our content is delivered across all platforms and enables industry professionals to discover and read this on their preferred device.

## UNCOVERING THE LAYERS

DATA CENTRE PREDICTIONS

LATEST INTELLIGENCE

**T**he role of data centre managers and their teams is more complex than ever. Technology is constantly evolving, bringing both new solutions and challenges. Budget constraints combined with companies increasingly expecting more in terms of Digital Transformation and the impact of cloud technology have made this role all the more challenging.

And technological advancements are only set to continue. Gartner has estimated that by 2022, half of large organisations will be integrating edge computing principles into their projects.

The research and advisory company has also urged infrastructure and operations leaders to evolve their strategies and skills in order to provide an agile infrastructure for their business and digitalisation needs.

*Intelligent Data Centres* provides data centre teams with the very

latest information and intelligence to help them make important, informed decisions. Our integrated platforms enable the industry to receive the content they need in a manner that suits them.

It is our unparalleled understanding of this audience which enables *Intelligent Data Centres* to deliver effective campaigns aimed at ensuring maximum return on investment combined with sustained brand awareness across our digital platforms. Strategic partnerships with regional industry bodies, events and research companies enable us to both manage and grow the audience.

While control for data centre projects will lie with its management team, we believe that a company should communicate with everybody involved in the process. The correct positioning and communication to the industry as a whole can prove an effective long-term plan. *Intelligent Data Centres* provides an integrated platform that reaches this audience.

## AUDIENCE BY COUNTRY/REGION %

\* As of Jan 1 2019, *Intelligent Data Centres* reaches 67,000 data centre professionals.

# OUR AUDIENCE

# INTELLIGENT DATA CENTRES AUDIENCE BREAKDOWN

Intelligent Data Centres is produced in association with the Data Centre Alliance (DCA)

#### About DCA

The data centre sector represents the engine driving the worldwide digital economy. Founded in 2010, The DCA Trade Association ensures that the media, governments and general public are kept informed of the vital role data centres play. The DCA is an established, vendor neutral, non-profit making organisation assisting members to connect with a growing data centre audience to share best practice, industry innovation and the latest research.
