

Key Benefits

Layered detection techniques

Malwarebytes Endpoint Protection employs multiple techniques to identify and defend against attacks at all stages of the attack chain using a highly effective mix of signature-less and matching-technology layers working both pre- and post-execution. Leveraging the best-informed telemetry, the pre-execution techniques are updated to continually drive toward earlier detection in the infection chain. Malwarebytes Endpoint Protection offers Real Time Protection for both Windows and Mac.

Complete and thorough remediation

Malwarebytes Endpoint Protection leverages our Linking Engine technology to remove all traces of infections and related artifacts—not just the primary threat payload. This signature-less approach speeds up threat scans and saves time normally spent wiping and re-imaging endpoints.

Cloud-enabled management

Malwarebytes Endpoint Protection is delivered via our Malwarebytes cloud-based endpoint management platform. This cloud platform reduces complexity, making it easy to deploy and manage Malwarebytes Endpoint Protection and other Malwarebytes solutions, regardless of the number of endpoints. This centralized cloud-console eliminates the need to acquire and maintain on-premises hardware.

SYSTEM REQUIREMENTS

Included Components

Malwarebytes cloud platform
Malwarebytes Endpoint Protection (persistent Windows agent)
Email and phone support

Hardware Requirements

Windows

CPU: 1 GHz
RAM: 1 GB (clients); 2 GB (servers)
Disk space: 100 MB (program + logs)
Active Internet connection

Mac

Any Apple device that supports Mac OS X (10.10 or newer)
Active Internet connection

Supported Operating Systems

Windows 10® (32-bit, 64-bit)
Windows 8.1® (32-bit, 64-bit)
Windows 8® (32-bit, 64-bit)
Windows 7® (32-bit, 64-bit)
Windows Vista® (32-bit, 64-bit)
Windows XP® with SP3 (32-bit only)
Windows Server 2016® (32-bit, 64-bit)
Windows Server 2012/2012R2® (32-bit, 64-bit)
Windows Small Business Server 2011
Windows Server 2008/2008R2® (32-bit, 64-bit)
Windows Server 2003® (32-bit only)
macOS 10.13 (High Sierra)
macOS 10.12 (Sierra)
macOS 10.11 (El Capitan)
macOS 10.10 (Yosemite)

Please note that Windows servers using the Server Core installation process are specifically excluded.

Windows Action Center integration not supported for Windows Server operating systems.
