SETTING YOURSELF UP FOR SUCCESS

GET PREPARED TO **ROCK YOUR CCSP** CERTIFICATION

GET FAMILIAR WITH THE EXAM. The [exam outline](#) is a great place to start. It's a free resource that details the major topics and subtopics within the 6 domains you will be tested on in the CCSP exam. Reviewing this outline can help set you up for success as you prepare for the exam.

CREATE URGENCY AND DEVELOP A PLAN. Commit to an exam date early. This can help you stay motivated and allow you to work backwards as you create a study schedule. Stay on track and stick to a routine by blocking study time on your calendar each day.

GRAB YOUR COPY OF THE CBK GUIDE BOOK. The [Official \(ISC\)² Guide to the CCSP CBK, 2nd Edition](#) should be utilized as your fundamental study guide in preparation for the CCSP exam and provides a comprehensive reference that will serve you for years to come.

REVIEW AND REFRESH YOUR KNOWLEDGE THROUGH TRAINING. Attending a formal training once you've begun studying can help reinforce the topics you've already explored. Choosing official training from (ISC)² provides several benefits, like access to the most up-to-date content with a focus on real-world learning activities and scenarios. You'll also be learning from an (ISC)²-authorized instructor who is an industry expert and certified CCSP. And, with diverse training options available - including in-person and online - you can pick what works best for you and your schedule.

BRUSH UP ON LESS FAMILIAR TOPICS. After your training, think about the topics that were covered and if there were any areas where you could improve. Refer back to your study materials and review those domains more closely as you continue to prepare.

PRACTICE, PRACTICE, PRACTICE! Now's the time to assess your exam readiness by going through realistic practice questions. You can find these practice questions in your CCSP CBK Guide, from the practice test you receive in your training seminar, or by searching the internet. Once you're acing the practice exams, you should feel confident that you're ready to take on the real thing!

CATCH SOME ZZZS. Try to relax in the days leading up to your exam. Go to bed at a reasonable hour the night before, and try to eat a healthy breakfast on the morning of your exam. Remember that the exam could take you up to 4 hours to complete - you might want to bring along a snack, too.

 **Good luck. You got this!**

STEPS TO GETTING CERTIFIED

1 Obtain the Required Experience

To qualify for the CCSP, you must have a minimum of 5 years of cumulative paid full-time information technology experience, of which 3 years must be in information security and 1 year in one of the 6 domains of the CCSP examination:

- Architectural Concepts & Design Requirements
- Cloud Data Security
- Cloud Platform & Infrastructure Security
- Cloud Application Security
- Operations
- Legal & Compliance

Don't have enough experience? Check out our Associate program at www.isc2.org/associate.

2 Take the Exam

Candidates are given four hours to complete the 125-question CCSP exam. Register at your local Pearson VUE Test Center:
