

Why should I use Citrix ShareFile if I already own Office 365 and the Microsoft Cloud?

1 of 5

corporate employees currently uses Microsoft Office 365

More than 20 million business users and 80,000 customers rely on Citrix ShareFile to collaborate securely with colleagues, customers, and partners. ShareFile is designed to work well with the tools you already own, including your Microsoft solutions.

Here are some ways you can get more out of your Microsoft Cloud subscriptions with Citrix ShareFile.

Way #1

Use ShareFile to access files in Office 365, Azure, SharePoint, and network shares from a single app.

- Get a single view of your files across Microsoft and non-Microsoft locations
- Share files easily, whether they live in Office 365, SharePoint, network shares, or anywhere else
- Access your files remotely without using FTP or VPN

Way #2

Use ShareFile to share files securely with anyone on any device.

- Optimize file syncing across physical and virtual desktops
- Control and track who is downloading files, when, and from where
- Protect the contents of files even if they are downloaded and re-shared

Way #3

Use ShareFile to create and complete document workflows and electronic signatures.

- Edit and co-author documents with Microsoft Office Web viewing
- Send documents for feedback and approvals and track it all in real time
- Request electronic signatures for contracts and other important documents

Visit citrix.com/sharefile to discover what Citrix ShareFile can do for your business.

"With more than one billion people using Microsoft Office — one in seven people on the planet — integration with Office Online offers ShareFile customers more flexibility in how they work with individuals and teams across businesses."
