

The background features a stylized cloud containing the letters 'AI' in a bright blue, glowing font. The cloud is surrounded by a complex network of glowing blue lines and nodes, resembling a circuit board or a data network. Various icons are scattered throughout, including a play button, a gear, and a square containing the binary code '0110000'.

GITEX
GLOBAL

ROUND TABLE

The role of AI in cybersecurity

Date Monday 14th October

Location Dubai World Trade Centre

Presented by

Lynchpin
Media

A G E N D A

13:30pm **Networking/afternoon pastries**

14:00pm **Table discussion**

15:15pm **Networking and tea/coffee**

The role of AI in cybersecurity grows more prominent each year. Security teams need to better understand which AI tools to invest in - and where to source them. Speed and precision are integral to a robust cybersecurity posture; therefore, AI has become their ‘right hand man’

Cybersecurity continues to dominate the IT landscape and AI has become crucial for addressing the speed, complexity and frequency of cyberthreats. But while AI can be used positively, it can also be exploited by bad actors to execute advanced malicious attacks on a scale humans couldn't achieve. Ten impressive CISOs from across the tech industry will come together during the week of GITEX Global to discuss the challenges they have faced when implementing AI in cybersecurity and how they have navigated the exciting world of automation in cybersecurity while still effectively managing risks.

T**

A large graphic on the left side of the page. It features the letters 'AI' in a bold, pink font, centered within a circular pattern of concentric dotted lines. Surrounding this central circle are various circuit-like patterns, including lines, dots, and semi-circular arcs, all in shades of pink and red. The background of the entire page is a dark blue gradient with a subtle pattern of small, light blue dots, resembling a starry sky or a digital network.

AI

TABLE DISCUSSION

**Is it safe to automate
cybersecurity through AI?**

TABLE DISCUSSION

**What ethical considerations
should be considered when
deploying AI for cybersecurity?**

TABLE DISCUSSION

What are the main challenges of implementing AI in cybersecurity?

**TABLE
DISCUSSION**

**Is AI damaging or
rebuilding the economy?**
