Mark Mann – Celebrity Photographer

Portrait photographer Mark Mann has worked with an illustrious roster of clients. He's taken some of the most iconic images of public figures ranging from former presidents to Rihanna, Stevie Wonder and Willie Nelson.

As a #DellInsideCircle member, Mark uses Dell Precision mobile workstations daily in his studio and on the go. We sat down with him to hear his thoughts on the role of technology in art and how the tools of his trade allow his subjects to shine brightest.

There are a lot of creators that still use Macs but my Precision workstation works faster and better with Adobe Creative Cloud, suits my needs, and if I need to replace it, it's less expensive.

Mark Mann – Celebrity Photographer

Challenges:

1

Photographers can't let technology lock them in with fixed configurations. They need the freedom of flexibility and ability to upgrade whenever they need to.

2

They can't afford to waste time optimizing hardware, software and performance. They need more time shooting, less time rendering!

3

They need to be confident that what they see on the screen will be exactly what the client receives.

Take your photography to the next level with our Pro solutions below:

14" Mobile Performance

Dell Precision 5490 mobile workstation

Discover the Dell Precision 5490: a sleek powerhouse for photographers. It's light, portable, and offers a stunning **4K+ display** with **100% Adobe RGB**. With **Adobe Creative Cloud ISV Certification** and an **AI-engine Intel CPU**, it learns and adapts to your workflow, optimizing performance for peak creativity. The **Dell Optimizer** enhances productivity, making it an indispensable tool in your artistic arsenal.

Maximum beauty. Minimal size.

This system weighs just over 3 lbs, yet packs plenty of power and is engineered to design, edit and finalize projects on the go.

Dell Precision workstations are certified and optimized for Adobe Creative Cloud.

14" Mobile Performance

Accessories

Dell UltraSharp 34 Curved Thunderbolt™ Hub Monitor | U3425WE

Experience clear focus and greater comfort with a 34" curved Thunderbolt™ hub monitor featuring 5-Star Eye Comfort and 120Hz refresh rate.

Dell Premier Multi-Device Wireless Keyboard and Mouse | KM7321W

Experience superior multitasking features with a stylish and comfortable premium keyboard and mouse combo. Complete your tasks powered by one of the industry's leading battery lives at up to 36 months.

Dell EcoLoop Premier Backpack 15

Designed to allow you to move quickly through TSA security checkpoints without removing your laptop, choose the Dell EcoLoop Premier Backpack 15 as your ultimate, earth-friendly travel companion.

Dell Thunderbolt™ Dock | WD22TB4

Modular thunderbolt dock with swappable modules for easy upgrades and SuperBoost technologies for fast charging.

Photo Studio Power

Dell Precision 3680 Tower workstation

When you need maximum performance to drive your studio sessions this Precision workstation gives me that. Manage your image libraries in Adobe Lightroom in a cinch, while performing touch-ups in Photoshop without any worry. Adding an UltraSharp display with 100% Adobe RGB coverage enables you to make the finest exposure adjustment and see them on screen.

Delivering optimized performance in an affordably priced tower

Incredible, scalable performance and reliability in a tower design, with access to every port you need to seamlessly connect you to all your photos.

Dell Precision workstations are certified and optimized for Adobe Creative Cloud.

Sepi Motamedi – Global Broadcast Industry Marketing Lead, NVIDIA

Sepi Motamedi leads global industry marketing for Professional Broadcast at NVIDIA. She manages the promotion and adoption of advanced technologies in the broadcast industry, including AI, advanced graphics, networking, and virtualized production. Before joining NVIDIA, Sepi led marketing in the digital media industry in both visual effects and feature animation.

New ways of creating, delivering and consuming live content are transforming the broadcast industry. This transformation demands that broadcasters rethink infrastructure with future-proofing in mind. Dell and NVIDIA provide the software-defined, hardware-accelerated broadcast infrastructure that is delivering the latest in AI, advanced graphics and IP based workflows, providing broadcasters with scalability, flexibility and ultimately the ability to stay ahead of the curve.

Collaborate with ease anywhere with this Teams certified wireless headset which offers active noise cancellation and smart sensors that automatically mute and unmute your call.

Dell Performance Dock | WD19DCS

Boost your PC's power up to 210W on the world's most powerful and first modular Dual USB-C dock with a future-ready design.

Dell Premier Collaboration Keyboard and Mouse | KM900

Designed with a surreal level of detail, our premium keyboard and mouse combo transform collaboration, enhance productivity and provide all-day comfort.

Why Dell for Media & Entertainment?

Dell Technologies helps media organizations efficiently create, manage and deliver content by simplifying their data environments and streamlining technology. In media and entertainment, workstation horsepower translates into keeping production schedules on track and delivering a sharper, more vivid picture of the artist's vision. Dell Precision workstations continue to form an integral part of that creativity and capability.

INTELLIGENT PERFORMANCE

Dell Optimizer – Take personalized PC performance to the next level with built-in, AI-based optimization software that learns and responds to the way you work.
World's most powerful mobile, tower and rack workstations.
World's most scalable tower workstations.
ISV Certification – Workstations optimized for your apps.

GROUND-BREAKING INNOVATION

First ready for XR and AI workstations, creating new categories.

MISSION CRITICAL RELIABILITY

Fully ISV certified, tested, Mil Standard specifications.
Most secure and manageable workstations.
OEM XL options available for extended life.

Dell Optimizer for Precision

Transform your work experience with Dell Optimizer for Precision; the only built-in AI-based optimization software that learns and responds to the way you work.¹

Dell Optimizer for Precision is built into all of our new Precision workstations. It provides all the optimization features from Dell Optimizer, plus an additional plugin in ExpressResponse to improve the performance of storage-heavy applications. It also identifies and removes bottlenecks with workload and system analytics, as well as diagnostics to improve utilization. With this built-in AI, you get professional-grade hardware and software for unmatched workstation performance.

¹ Based on Dell analysis, November 2019.

Learn
the way you work

Enhance
application performance

Improve
battery run time

Improve
audio experience

Enable quicker sign-in,
and secure your system
when you walk away

ISV Certification

Dell partners with industry-leading technology companies to solve today's most complex problems in application computing.

SEAMLESS RELIABILITY

ISV (Independent Software Vendor) certification means that the Dell Precision workstations you purchase are **tested to ensure that the high-performance applications you work with every day, run smoothly.**

GET THE MOST OUT OF YOUR SOFTWARE APPLICATIONS

ISV certification is the result of precise engineering and rigorous testing to optimize performance and reliability to run leading industry applications, allowing you to run leading industry applications with maximum confidence and performance.

Taking the next step

Unleash the full potential of AI in your media and entertainment projects. Transform your creative landscape with technology that amplifies productivity and ignites creativity.
